🌐 Portfolio

Education

The LNM Institute of Information Technology (LNMIIT)

June 2027

Bachelor of Technology in Computer Science;

Jaipur, Rajasthan

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Computer Architecture, Operating Systems, Computer Networks.

Experience

Software Engineer Intern

May 2024 – July 2024

LUSIP (LNMIIT)

Jaipur, India

- Engineered a cross-platform **React Native** application serving **2,500+ users** across 6 campus services, architecting **Firestore** schema and security rules for role-based access control across 6 user types.
- Built real-time order tracking system with vendor dashboard and push notifications using **Firebase Cloud Messaging**, enabling equipment rental monitoring and athlete attendance management with live database synchronization.
- Reduced codebase maintenance overhead by **30%** through modular component architecture and reusable UI primitives, improving developer velocity and deployment consistency.

Web Development Lead

Aug 2024 – Present

Google Developer Student Club (GDSC)

Jaipur, India

- Led development of a **Next.js** event platform managing a team of **5 developers**, processing **2K+ registrations** and **30K monthly page views** through an integrated registration and community forum system.
- Designed and implemented **RESTful APIs** with **MongoDB** backend, integrating **Cloudinary** for optimized image delivery with lazy loading to reduce page load time across mobile and desktop.
- Architected QR-based payment workflow with proof verification, while designing the complete UI/UX from scratch and mentoring junior developers on implementation best practices.

Projects

NexusPrice – Distributed Token Price Aggregation System | Next.js, Redis, BullMQ, MongoDB

- Architected a distributed price aggregation engine tracking **15,000+ tokens** at **500+ jobs/minute**, implementing **BullMQ** worker pools and **Redis** TTL-based caching, reducing latency from 250ms to **150ms (40% improvement)**.
- Designed fault-tolerant fallback using linear interpolation for price estimation during API outages, achieving **99.9% availability** with **MongoDB** for time-series storage and aggregation-based analytics.

VOXC – Voice-Controlled Web Automation Extension | JavaScript, Web Speech API, Gemini Flash, DOM APIs

- **Chrome Featured Badge** – Built a voice-controlled automation tool with **400+ users**, implementing fuzzy matching to parse DOM, score elements, and execute clicks via voice commands with **90% accuracy** (e.g., "headphones" → finds and clicks matching links).
- Designed multi-modal interface with **Web Speech API** for real-time recognition and **Gemini Flash** for AI summarization/translation across 6 languages, using BYOK architecture to eliminate API costs.

Technical Skills

Languages: JavaScript, TypeScript, C++, Python, SQL

Frontend: React, Next.js, React Native, Tailwind CSS, HTML/CSS

Backend & Infrastructure: Node.js, Express, Firebase, MongoDB, Redis, REST APIs

Databases: MongoDB, MySQL, PostgreSQL (schema design, indexing, normalization)

Cloud & DevOps: Firebase Hosting, Vercel, Cloudinary, CI/CD basics, Containerization (Docker - basics)

Testing & Quality: Postman API Testing, Unit Testing (Jest - basics), Debugging Performance Optimization

Developer Tools: Git, GitHub, Agile/Scrum workflows, Postman, Chrome DevTools, VS Code

Specialized: BullMQ (Job Queues), Web Speech API, Chrome Extensions, Distributed Caching, Asynchronous Processing
